Email: admin@telegramrocket.com

Thank you for purchasing my software. If you have any questions that are beyond the scope of this help file, please feel free to email via my user page contact form here. Thanks so much!

Table of Contents

A) Installation & Setup - top

1. Enter your license key and activate the software.
2. Create an application by visiting my.telegram.org to get the api_id & api_hash before you start the adding/ scraping process. (compulsory step only for the first time)
3. Enter your phone number and get the confirmation code that are sent to your Telegram account, you will receive the message from your Telegram message shortly after you enter your phone number at my.telegram.org
4. Make sure you have created a Telegram account with the given phone number that you have entered. If not, go and create a Telegram account before continuing step (3).
5. Once the confirmation code is confirmed, click the *API development tools.*
6. Enter any app title and short name, select any platform, leave the URL and Description fields blank and click the create button. If any error occurs make sure you turn off your VPN.
7. Now copy the provided api_id & api_hash and open TelegramRocket Bot and click add number and paste everything into it.
8. You are required to enter the sign in code.
9. If you do not see the sign in code, kindly ensure you have entered the api_id & api_hash and phone number with country code correctly.
10. You will not receive sign in code if you have your 2FA (2 Factor Authentication) enabled, please disable it for this step and you can enable back again later.
11. You will receive sign in code from Telegram message, enter the sign in code and your number will be added successfully.

B) Telegram Adder - top

1. Go to Preference for Mac app; File > Setting for Windows app
2. Enter the link of the group or name of the group you wish to add and click save.
3. You can customize your adding process by setting a value for the min & max time range which allow adding process to take place at random time interval.
4. Make sure the selected user id has been invited to the group you wish to add. If not, the adding cannot be done, you can invite the user id by adding them to the group.
5. Make sure the group you wish to add are changed to public group from private group.
6. If you have disabled add user permission in your group, kindly enable it back again.
7. Each user id has the capability of adding 50 members in 24 hours interval before you get peer flood error from Telegram. You only can continue the adding process after 24 hours. Unless you have prepared more than one Telegram account, there is no limit on how much Telegram account you can add to our software.
8. Make sure you have scraped members ready before undergoing the adding process.
9. You can manually select the Telegram account you wish to undergo the adding process, or click select all if you prefer to use all Telegram account for adding at once.

C) Telegram Scraper - top

1. Select an user id which has joined the group that you wish to scrap.
2. Click the scrap button.
3. A pop-up window will appear and select the group you want to scrap.
4. The scraped members will be saved in members.csv file.
5. You can use it for adding purpose later.

D) Import Backup & Export Backup - top

1. If you wish to use the later version software in the future, you can migrate all your previous files easily with just single click on the *Export Backup* button and then select the file path to locate the export backup's folder.
2. A compressed zip backup folder will be produced and can later be imported to another later version software.
3. For Windows user only, you can delete the old executable file and replace it with the newer *TelegramRocket.exe* in the current directory if you do not wish to use the import and export features.
4. For Mac user, please backup your files before migrating to the later version by completing the steps in **Section D.1 & D.2** and do not replace the application file as it will deleted the entire files. Since Mac OS behaves differently than Windows OS.
5. If you are using an older version v0.1.0 which do not have Import Backup & Export Backup feature, watch my video on how to migrate the files for MacOS.

E) FAQ - top

1. I could not open the file from Mac application after downloading it.
   Kindly move the downloaded file to application folder and remember to allow app downloaded from unidentified developers.
   (Tips) System Preferences > Security Privacy > Allows app downloaded from: App Store and unidentified developers.

2. "Peer Flood Error" message shows up during adding process, what does it mean?
   Peer Flood Error is a common error throws by Telegram when they detect your account is used for spamming, however you won't be banned as it is temporary and will recover itself after 24 hours. You can try to refresh the Telegram Rocket software or restart the application or proceed with other available phone number while waiting for Telegram to recover your privilege to continue with the adding process.

3. I'm getting Peer Flood Error after adding not greater than 2-3 members. Why?
   This does not apply to all newly created Telegram account, but there is a small chances you will bump into this.
   Telegram has provided little credibility for newly created Telegram account that just created not longer than 7 days to add members in order to fight spam.
   You just have to wait for 7 days, while waiting you can try add as much Telegram account as you can. Unless you are using old Telegram account.

4. "Last row of phone number has been reached" message shows up, what does it mean?
   The adding process has completed its task, try to reset it by clicking on the *Reset All Last Used* if you wish to perform any operation again.

5. "database is locked" message shows up, what does it mean?
   Restart the application and try again will solve the problem.
   An older process is still running and is using the same 'session' file. This error occurs when two or more clients use the same session.

6. "This phone number is no longer authorized, please remove and add this phone number again" message shows up, what does it mean?
   The Telegram account's session has expired, it could be either missing or accidentally deleted log session files. Or else, your Telegram account has been banned. You can remove the Telegram account by selecting the account and click on the delete button.

7. "RPCError 406: UPDATE_APP_TO_LOGIN (caused by SendCodeRequest)" message shows up, what does it mean?
   Telegram has started enforcing the use of 64-bit identifiers for users and chats starting from 1 December 2021 onwards.
   If you are using any version later than Telegram Rocket (v.0.1.3 beta) then the software should be working fine unless we made another new annoucement.

   Kindly download the latest version from our official website telegramrocket.com/download

8. Where is the members.csv file located?
   [Mac app]
   Right click on the Telegram Rocket Bot > Show package content > Resources > members.csv
   [Windows app]
   Located at file directory

Once again, thank you so much for purchasing this software. As I said at the beginning, I'd be glad to help you if you have any questions relating to this software. No guarantees, but I'll do my best to assist. If you have a more general question relating to the software, you might consider visiting the forums and asking your question in the "Item Discussion" section or drop us an email at admin@telegramrocket.com
